## 2. Getting Familiar with the **PlayIt**:

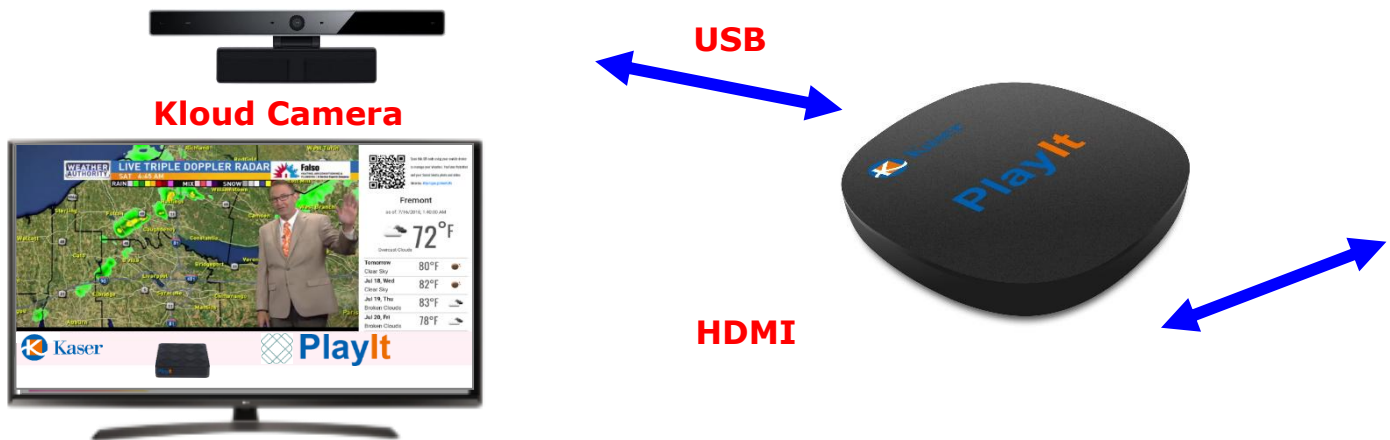

### 3. Connecting **PlayIt**:

What You Need to Get **PlayIt** Installed and Connected:

- The **PlayIt**,
- TV / LCD Monitor with HDMI interface,
- HDMI cable,
- An Internet connection:
  - An Ethernet Hub, Switch or IP sharing device or
  - A WIFI/WLAN Connection
- A segment of Cat.5 UTP cable for connecting to hub or switch (needed only when you choose wired connection)
- A Power Adapter.
- A Google Gmail account for logging into the Android system.

(Please register for a free Gmail account: [www.gmail.com](http://www.gmail.com), if you do not have one.)

Connecting Kloud Camera, HDMI connectors to the **PlayIt**:

Applying Power to the **PlayIt**:

Connect DC Jack of the power adapter into the **PlayIt** and plug the Adapter end into an AC power outlet.

Connecting **PlayIt** to your Local Area Network:

If you use **Wired LAN** connection:

- Connect one end of the Cat.5 UTP cable to your Ethernet Hub or Switch.
- Connect the other end of the UTP cable to the Ethernet port on the rear panel of the **PlayIt**.

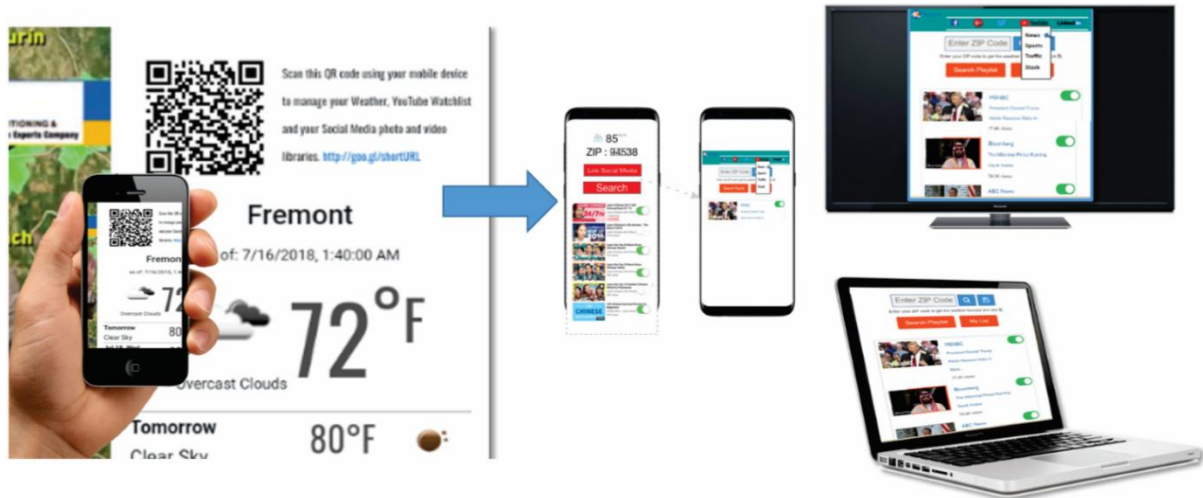

If you use **Wireless LAN** connection, make sure a WiFi Access Point or an IP Sharing device with WiFi support is in place and ready for the **PlayIt** to get connected.

#### 4. Getting Ready for the First Boot:

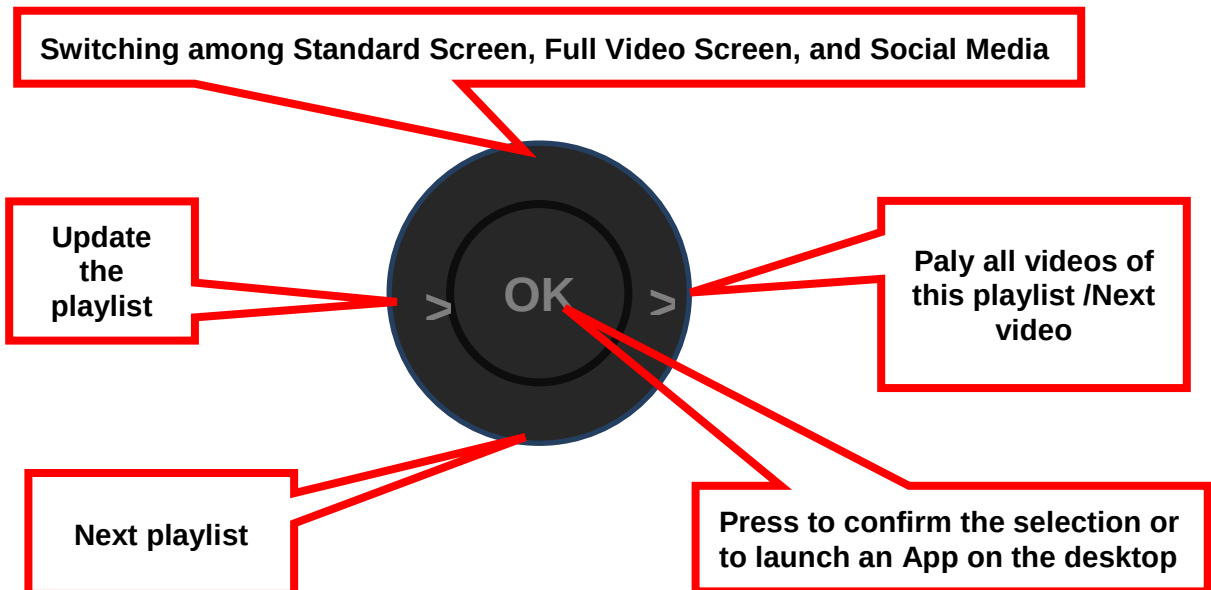

**PlayIt** will enter a “Setup Page” if this is the first time that **PlayIt** is booted up.
